The CHS Council Bluffs Pipeline and the CHS Conway Pipelines, are inter-regional petroleum pipelines solely owned by CHS who distributes products manufactured by a refinery located in McPherson, Kansas.

CHS operates this 85,000 barrel per day refinery and a 228 mile refined products pipeline from the refinery to Council Bluffs, IA where the storage terminal is located. Also there are 5 five distinct lines that transport various refined products to and from the refinery and underground storage caverns in Conway, KS. These five lines carry gasoline, NGL's, butane, propane and pentane.

In addition to the refinery and products pipeline, CHS's facilities include a regional office at McPherson and a crude oil trucking fleet of approximately 80 transports which operate in western Kansas. CHS also owns 100% of Jayhawk Pipeline, L.L.C., 66% of Kaw Pipe Line Company and 50% of Osage Pipe Line L.L.C.

**KANSAS
COUNTIES OF OPERATION:**

Clay	McPherson
Dickinson	Riley
Marshall	Saline

Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.

COMMITMENT TO SAFETY, HEALTH & ENVIRONMENT

CHS Inc. is committed to participation in public education and environmentally furthering the general awareness of the public to the issues surrounding our pipeline operation.

This has included the development, implementation, and management of a Public Awareness Program (PAP). Through these efforts, the operator will enhance public safety, further protect the environment, and reduce the risk of third-party damage to the pipeline system.

The company and its management will provide the needed support, resources, and funding required to accomplish these goals. CHS's highest priority is the transportation of petroleum products throughout its system and in a reliable, safe and friendly manner.

CHS is dedicated to these goals and follows all applicable pipeline rules and regulations. Ensuring the mechanical integrity of its pipeline system is an important ingredient toward accomplishing our goals. To this end, CHS has created and implemented a comprehensive pipeline Integrity Management Plan (IMP). For additional information, contact us via email, phone or visit our web site as listed above.
