The City of Waukeee is located in central Iowa, a western suburb of Des Moines, with a service area population base of approximately 18,000. The City is governed by a mayor and five council members who are committed to meeting the needs of the community. Waukeee, once a small town, has grown into a busy city; however, this has not been without the challenges of meeting the needs of the new growth while maintaining affordable natural gas service to its customers.

The City of Waukeee gas system was started in 1966 with approximately 200 customers and 3.0 miles of natural gas pipeline. The

system to date has approximately 6200 customers, 103 miles of distribution main and an annual usage of 468,000 Mcf. The City of Waukeee contracts gas with Northern Natural Gas who delivers to our TBS using US Energy Services as its agent.

Due to the growth over the past couple of decades, the City of Waukeee has contracted with Black Hills Energy to construct an additional 14.5 miles of 8" transmission pipeline. This pipeline connects with Northern Natural Gas at a new location to meet the need for immediate capacity on peak day as well as available capacity for new growth.
