COMPANY PROFILE

MidAmerican is a combination gas and electric utility with its corporate office in Des Moines, Iowa. MidAmerican operates nearly 12,300 miles of distribution main, over 656,000 service lines and approximately 800 miles of transmission pipeline in four states: Iowa, Illinois, South Dakota and Nebraska. MidAmerican serves over 726,000 gas customers and over 746,000 electric customers.

MidAmerican receives gas from four primary pipeline transportation companies: Northern Natural, Northern Border, Natural Gas Pipeline, and ANR Pipeline. MidAmerican only transports natural gas and does not transport liquids.

MidAmerican operates three storage facilities to augment pipeline supplies during high consumption days. Liquefied natural gas plants are located in Waterloo, Des Moines, and Bettendorf.

Upon request, MidAmerican will provide training related to gas emergency response. The MidAmerican website provides general company information, gas safety notices, and other safety related information. Specific gas safety (non-emergency) questions, requests for training, or requests to review MidAmerican's emergency response plan can be sent to PublicAwareness@midamerican.com.

COMMITMENT TO SAFETY, HEALTH & ENVIRONMENT

MidAmerican is committed to the safety of its employees, customers, and the general public.

MidAmerican designs, constructs, operates, and maintains its facilities in compliance with all the requirements of DOT 49 CFR 192 "Transportation of Natural and Other Gas by Pipeline: Federal Safety Standards." To assure compliance with all regulations and the operation of safe and reliable pipeline facilities, MidAmerican has an active internal auditing process that inspects and evaluates company facilities.

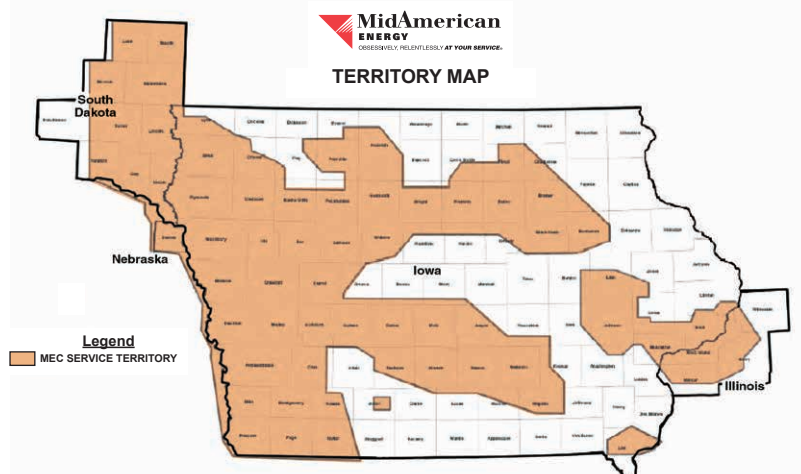

The primary cause of all pipeline incidents is third-party dig-ins. MidAmerican is an enthusiastic and active supporter of state One Call systems.

MidAmerican has trained personnel to respond to gas leaks and other gas emergencies in a timely manner. Responders are supported by an automated dispatch system, continuous contact with a 24 x 7 dispatch center, and an Emergency Plan that can quickly establish communication with support personnel and mobilize resources rapidly.

Environmental

MidAmerican believes responsible environmental management is good business; it benefits our customers and improves the quality of the environment in which we live.

MidAmerican employees are responsible and accountable for understanding and incorporating environmental compliance requirements into their daily work activities with obligation to bring issues and concerns forward for resolution.
